

MATHEMATICS ASSOCIATION OF PODAR

Teacher In-charge : Dr. Suresh Hiremath

Student Secretary : Ms.Mrunmayee Mayekar

The forum Mathematics Association of Podar organizes a Pan India Level Festival Mathematrix. The aim of Mathematrix has always been to remove the stigma attached to Mathematics as a boring subject by presenting it to students in a fun way through challenging competitions and exhilarating exhibitions. We successfully hosted the first ever version of Online Mathematrix last year with over 1000+ participants from colleges and 1150+ participants from schools. Be it through the exhibitions, or through the various events, Mathematrix uses the magic balance between fun and learning to give an experience that not many have the luxury to. All while inculcating a deep interest in the field of Mathematics. The seed of a thoughtful vision sown ten years back, has bloomed into a vibrant flower today! We are proud to announce that...

THE YEAR 2022-23 MARKS THE 10TH YEAR OF

MATHEMATRIX SPREADING MATHGIC!

The Theme of this year was 'Magical, Mysterious & Majestic'. These are the words that portray what π -land is all about! Team Mathematrix has received a call for help from an unknown location, with only the coordinates as our guide. We are setting forth on a daring expedition to this mystical island to see what lies yonder. Our ancient knowledge suggests that the only language that works there is Math! Past, present, future along with imagination and reality, all converge in a draMATHic manner on this island. Who will join us for this mathematical adventure and who can help us explore the perilous parts of π -land! Who will be the Vasco Da Gama

venturing forth into this unknown expanse? Who will be the DISCOVERERS OF THE DECENNIUM?

Social Initiatives

Team Mathematrix, heartily dedicates itself to the benefits of self and society. Thus, social initiatives form an integral part of Mathematrix where avenues are identified for Mathematrix to lend a helping hand in. This year, Mathematrix aims to provide specially-abled students a platform to explore their intellectual capabilities and their love for mathematics. Distinguishing between a regular student and specially-abled student is never done in Mathematrix as the events level set for them is the same. It's just the mediums of executing that are different.

Target Audience

Mathematrix is a fest that includes all the various facets of a student's life from school to college and through the various social initiatives impacts students of various backgrounds. Mathematrix includes both children from schools studying in standards 7th to 10th as well as college students of various fields from 11th to Third year Degree College. We are Proud to inform you that This year Mathematrix opened its doors to over 1500 students from schools and over 850 college students for the online round 1 and 200 students for round 2 schools and 150 students for round 2 colleges.
